It has been a productive year for Goulburn Cycle Club

The highlight was the selection of our junior member Elsie Apps, in the Australian Cycling Academy Skip Capital Development Team, one of eight riders selected from Australia wide. The team completed a three-month trip to Europe, and while based in Belgium participated in some intense coaching and training sessions and competed in a tough racing program. Elsie was the youngest member of the team and acquitted herself very well showing a massive development in all areas, both on and off the bike. It is hoped that her performances have ensured a place in the team for 2026.

Elsie is a product of the club's junior development program and has provided an example what can be achieved from a country club and given our current juniors an example to follow

Our Goulburn Workers Junior 2 Day Tour celebrated twenty years in April with special medals presented to place getters in all age divisions. Goulburn Cycle Club is indebted to the Workers being the major sponsor since inception in 2005. It has grown and now recognised as one of the best junior tours in Australia. This year's tour also had the most interstate competitors with riders coming from Queensland, Victoria, South Australia and Western Australia.

Our annual Trackpower Carnival celebrated thirty years with another successful event with two riders from Great Britain entering and promising to return. The juniors benefited from support provided by the Workers. With a number of carnivals now missing from the calendar, Goulburn Trackpower has continued to lead the way.

Our senior road event, the Goulburn Great Divide, also attracts the best NSW riders and from interstate. This year's event incorporated the NSW Time Trial and Road championships.

For a small club, Goulburn Cycle Club delivers more quality events than any other.
